

2003 International Building Code Overview

Introduction

Internationally, code officials recognize the need for a modern, up-to-date building code addressing the design and installation of building systems through requirements emphasizing performance. The International Building Code, in this 2003 edition, is designed to meet these needs through model code regulations that safeguard the public health and safety in all communities, large and small.

This comprehensive building code establishes minimum regulations for building systems using prescriptive and performance-related provisions. It is founded on broad-based principles that make possible the use of new materials and new building designs. This 2003 edition is fully compatible with all the International Codes ("I-Codes") published by the International Code Council (ICC), including the ICC Electrical Code, International Energy Conservation Code, International Existing Building Code, International Fire Code, International Fuel Gas Code, International Mechanical Code, ICC Performance Code, International Plumbing Code, International Private Sewage Disposal Code, International Property, Maintenance Code, International Residential Code, International Urban-Wildland Interface Code and International Zoning code.

The International Building Code provisions provide many benefits, among which is the model code development process that offers an international forum for building professionals to discuss performance and prescriptive code requirements. This forum provides an excellent arena to debate proposed revisions. This model code also encourages international consistency in the application of provisions.

Development

The first edition of the International Building Code (2000) was the culmination of an effort initiated in 1997 by the ICC. This included five drafting subcommittees appointed by ICC and consisting of representatives of the three statutory members of the International Code Council: Building Officials and Code Administrators International, Inc. (BOCA), International Conference of Building Officials (ICBO) and Southern Building Code Congress International (SBCCI). The intent was to draft a comprehensive set of regulations for building systems consistent with and inclusive of the scope of the existing model codes. Technical content of the latest model codes promulgated by BOCA, ICBO and SBCCI was utilized as the basis for the development, followed by public hearings in 1997, 1998 and 1999 to consider proposed changes. This 2003 edition presents the code as originally issued, with changes approved through the ICC Code Development Process through 2002. A new edition such as this is promulgated every three years.

With the development and publication of the family of International Codes in 2000, the continued development and maintenance of the model codes individually promulgated by

Codes") was discontinued. This 2003 International Building Code, as well as its predecessor-the, 2000 edition, is intended to be the successor building code to those codes previously developed by BOCA, ICBO and SBCCI.

The development of a single set of comprehensive and coordinated family of International Codes was a significant milestone in the development of regulations for the built environment. The timing of this publication mirrors a milestone in the change in structure of the model codes, namely, the pending Consolidation of BOCA, ICBO and SBCCI into the ICC. The activities and services previously provided by the individual model code organizations will be the responsibility of the Consolidated ICC.

This code is founded on principles intended to establish provisions consistent with the scope of a building code that adequately protects public health, safety and welfare; provisions that do not unnecessarily increase construction costs; provisions that do not restrict the use of new materials, products or methods of construction; and provisions that do not give preferential treatment to particular types or classes of materials, products or methods of construction.

Adoption

The International Building Code is available for adoption and use by jurisdictions internationally. Its use within a governmental jurisdiction is intended to be accomplished through adoption by reference in accordance with proceedings establishing the jurisdiction's laws. At the time of adoption, jurisdictions should insert the appropriate information in provisions requiring specific local information. such as the name of the adopting jurisdiction. These locations are shown in bracketed words in small capital letters in the code and in the sample ordinance. The sample adoption ordinance on page v addresses several key elements of a code adoption ordinance, including the information required for insertion into the code text.

Maintenance

The International Building Code is kept up to date through the review of proposed changes submitted by code enforcing officials, industry representatives, design professionals and other interested parties. Proposed changes are carefully considered through an open code development process in which all interested and affected parties may participate.

The contents of this work are subject to change both through the Code Development Cycles and the governmental body that enacts the code into law. For more information regarding the code development process, contact the Code and Standard Development Department of the International Code Council.

While the development procedure of the International Building Code assures the highest degree of care, ICC and the founding members of ICC-BOCA, ICBO, SBCCI-their

resulting from compliance or noncompliance with the provisions because ICC and its founding members do not have the power or authority to police or enforce compliance with the contents of this code. Only the governmental body that enacts the code into law has such authority.

Letter Designations in Front of Section Numbers

In each code development cycle, proposed changes to this code are considered at the Code Development Hearing by the International Building, Code Development Committee, whose action constitutes a recommendation to the voting membership for final action on the proposed change. Proposed changes to a code section whose number begins with a letter in brackets are considered by a different code development committee. For instance, proposed changes to code sections which have the letter [IF] in front (e.g., [IF] 1001.3). are considered by the International Fire Code Development Committee at the Code Development Hearing. Where this designation is applicable to the entire content of a main section of the code, the designation appears at the main section number and title and is not repeated at every subsection in that section.

The content of sections in this code which begin with a letter designation is maintained by another code development committee in accordance with the following: [EI = International Energy Conservation Code Development Committee; [EBI = International Existing Building Code Development Committee-, [EL] = ICC Electrical Code Development Committee; [F] = International Fire Code Development Committee. [M] = International Mechanical Code Development Committee; [PI = International Plumbing Code Development Committee, [PC] = ICC Performance Code Development Committee; [PM] = International Property Maintenance Code Development Committee; [RBEI = International Residential Code Building and Energy Development Committee; [RMPI = International Residential Code Mechanical/Plumbing Development Committee; [UWI = International Urban-Wildland Interface Code Development Committee; and [Z] = International Zonine, Code Development Committee.

Marginal Markings

Solid vertical lines in the margins within the body of the code indicate a technical change from the requirements of the 2000 edition. Deletion indicators (-->) are provided in the margin where a paragraph or item has been deleted.

Chapter 10 user note: Chapter 10 of the code has been reorganized from the 2000 edition as a result of an approved code change proposal. This resulted in a renumbering of the chapter from nine sections to 25. The presentation of text predominantly follows that of the 2000 edition, however, the section numbers have been revised. Marginal markings are included at each section number but have not been included to reflect the subsection renumbering. A comprehensive 2000/2003 Chapter 10 section number cross index is posted on the ICC website at www.intlcode.org.

Table of Contents

CHAPTER 1 ADMINISTRATION, 1

Section

- 101 General, 1
- 102 Applicability, 1
- 103 Department of Building Safety, 2
- 104 Duties and Powers of Building Official, 2
- 105 Permits, 3
- 106 Construction Documents, 5
- 107 Temporary Structures and Uses, 6
- 108 Fees, 6
- 109 Inspections, 7
- 110 Certificate of Occupancy, 7
- 111 Service Utilities, 8
- 112 Board of Appeals, 8
- 113 Violations, 8
- 114 Stop Work Order, 8
- 115 Unsafe Structures and Equipment, 9

CHAPTER 2 DEFINITIONS, 11

Section

- 201 General, 11
- 202 Definitions, 11

CHAPTER 3 USE AND OCCUPANCY CLASSIFICATION, 23

Section

- 301 General, 23
- 302 Classification, 23
- 303 Assembly Group A, 24
- 304 Business Group B, 26
- 305 Educational Group E, 26
- 306 Factory Group F, 26
- 307 High-Hazard Group H, 27
- 308 Institutional Group I, 34
- 309 Mercantile Group M, 36
- 310 Residential Group R, 36
- 311 Storage Group S, 36
- 312 Utility and Miscellaneous Group U, 37

CHAPTER 4 SPECIAL DETAILED REQUIREMENTS BASED ON USE AND OCCUPANCY, 39

Section

- 402 Covered Mall Buildings, 39
- 403 High-Rise Buildings, 41
- 404 Atriums, 43
- 405 Underground Buildings, 43
- 406 Motor-Vehicle-Related Occupancies, 44
- 407 Group 1-2, 48
- 408 Group 1-3, 49
- 409 Motion Picture Projection Rooms, 50
- 410 Stages and Platforms, 51
- 411 Special Amusement Buildings, 53
- 412 Aircraft-Related Occupancies, 54
- 413 Combustible Storage, 55
- 414 Hazardous Materials, 56
- 415 Groups H-1, H-2, H-3, H-4 and H-5, 59
- 416 Application of Flammable Finishes, 71
- 417 Drying Rooms, 72
- 418 Organic Coatings, 72

CHAPTER 5 GENERAL BUILDING HEIGHTS AND AREAS, 73

Section

- 501 General, 73
- 502 Definitions, 73
- 503 General Height and Area Limitations, 73
- 504 Height Modifications, 75
- 505 Mezzanines, 75
- 506 Area Modifications, 76
- 507 Unlimited Area Buildings, 76
- 508 Special Provisions, 77

CHAPTER 6 TYPES OF CONSTRUCTION, 81

Section

- 601 General, 81
- 602 Construction Classification, 81
- 603 Combustible Material in Types I and II Construction, 82

CHAPTER 7 FIRE-RESISTANCE-RATED CONSTRUCTION, 85

Section

- 701 General, 85
- 702 Definitions, 85
- 703 Fire-Resistance Ratings and Fire Tests, 86
- 704 Exterior Walls, 87
- 705 Fire Walls, 90
- 706 Fire Barriers, 92
- 707 Shaft Enclosures, 93

709 Smoke Barriers, 96
710 Smoke Partitions, 96
711 Horizontal Assemblies, 96
712 Penetrations, 97
713 Fire-resistant Joint Systems, 99
714 Fire-resistance Rating of Structural Members, 99
715 Opening Protectives, 100
716 Ducts and Air Transfer Openings, 103
717 Concealed Spaces, 107
718 Fire-resistance Requirements for Plaster, 108
719 Thermal- and Sound-Insulating Materials, 109
720 Prescriptive Fire Resistance, 109
721 Calculated Fire Resistance, 110

CHAPTER 8 INTERIOR FINISHES, 157

Section

801 General, 157
802 Definitions, 157
803 Wall and Ceiling Finishes, 157
804 Interior Floor Finish, 160
805 Decorations and Trim, 160

CHAPTER 9 FIRE PROTECTION SYSTEMS, 163

Section

901 General, 163
902 Definitions, 163
903 Automatic Sprinkler Systems, 166
904 Alternative Automatic Fire-Extinguishing Systems, 170
905 Standpipe Systems, 171
906 Portable Fire Extinguishers, 173
907 Fire Alarm and Detection Systems, 173
908 Emergency Alarm Systems, 180
909 Smoke Control Systems, 181
910 Smoke and Heat Vents, 189
911 Fire Command Center, 191

CHAPTER 10 MEANS OF EGRESS, 193

Section

1001 Administration, 193
1002 Definitions, 193
1003 General Means of Egress, 194
1004 Occupant Load, 195
1005 Egress Width, 196
1006 Means of Egress Illumination, 197

- 1008 Doors, Gates and Turnstiles, 199
- 1009 Stairways and Handrails, 204
- 1010 Ramps, 206
- 1011 Exit Signs, 207
- 1012 Guards, 208
- 1013 Exit Access, 209
- 1014 Exit and Exit Access Doorways, 210
- 1015 Exit Access Travel Distance, 211
- 1016 Corridors, 212
- 1017 Exits, 213
- 1018 Number of Exits and Continuity, 213
- 1019 Vertical Exit Enclosures, 214
- 1020 Exit Passageways, 216
- 1021 Horizontal Exits, 216
- 1022 Exterior Exit Ramps and Stairways, 217
- 1023 Exit Discharge, 217
- 1024 Assembly, 219
- 1025 Emergency Escape and Rescue, 223

CHAPTER 11 ACCESSIBILITY, 225

Section

- 1101 General, 225
- 1102 Definitions, 225
- 1103 Scoping Requirements, 225
- 1104 Accessible Route, 226
- 1105 Accessible Entrances, 227
- 1106 Parking and Passenger Loading Facilities, 228
- 1107 Dwelling Units and Sleeping Units, 228
- 1108 Special Occupancies, 231
- 1109 Other Features and Facilities, 233
- 1110 Signage, 236

CHAPTER 12 INTERIOR ENVIRONMENT, 239

Section

- 1201 General, 239
- 1202 Definitions, 239
- 1203 Ventilation, 239
- 1204 Temperature Control, 240
- 1205 Lighting, 240
- 1206 Yards or Courts, 241
- 1207 Sound Transmission, 241
- 1208 Interior Space Dimensions, 241
- 1209 Access to Unoccupied Spaces, 242
- 1210 Surrounding Materials, 242

CHAPTER 13 ENERGY EFFICIENCY, 243

Section

1301 General, 243

CHAPTER 14 EXTERIOR WALLS, 245

Section

1401 General, 245

1402 Definitions, 245

1403 Performance Requirements, 245

1404 Materials, 246

1405 Installation of Wall Coverings, 246

1406 Combustible Materials on the Exterior
Side of Exterior Walls, 250

1407 Metal Composite Materials (MCM), 251

CHAPTER 15 ROOF ASSEMBLIES AND ROOFTOP STRUCTURES, 253

Section

1501 General, 253

1502 Definitions, 253

1503 Weather Protection, 253

1504 Performance Requirements, 254

1505 Fire Classification, 254

1506 Materials, 255

1507 Requirements for Roof Coverings, 255

1508 Roof Insulation, 264

1509 Rooftop Structures, 264

1510 Reroofing, 265

CHAPTER 16 STRUCTURAL DESIGN, 267

Section

1601 General, 267

1602 Definitions, 267

1603 Construction Documents, 269

1604 General Design Requirements, 270

1605 Load Combinations, 273

1606 Dead Loads, 274

1607 Live Loads, 274

1608 Snow Loads, 279

1609 Wind Loads, 283

1610 Soil Lateral Load, 298

1611 Rain Loads, 298

1612 Flood Loads, 299

1613 Earthquake Loads Definitions, 301

1614 Earthquake Loads-General, 302

- 1616 Earthquake Loads-Criteria Selection, 325
- 1617 Earthquake Loads-Minimum Design Lateral Force and Related Effects, 329
- 1618 Dynamic Analysis Procedure for the Seismic Design of Buildings, 338
- 1619 Earthquake Loads Soil-Structure Interaction Effects, 338
- 1620 Earthquake Loads-Design, Detailing Requirements and Structural Component Load Effects, 338
- 1621 Architectural, Mechanical and Electrical Component Seismic Design Requirements, 342
- 1622 Nonbuilding Structures Seismic Design Requirements, 342
- 1623 Seismically Isolated Structures, 343

CHAPTER 17 STRUCTURAL TESTS AND SPECIAL INSPECTIONS, 345

Section

- 1701 General, 345
- 1702 Definitions, 345
- 1703 Approvals, 345
- 1704 Special Inspections, 346
- 1705 Quality Assurance for Seismic Resistance, 353
- 1706 Quality Assurance for Wind Requirements, 354
- 1707 Special Inspections for Seismic Resistance, 355
- 1708 Structural Testing for Seismic Resistance, 356
- 1709 Structural Observations, 357
- 1710 Design Strengths of Materials, 357
- 1711 Alternative Test Procedure, 357
- 1712 Test Safe Load, 357
- 1713 In-Situ Load Tests, 358
- 1714 Preconstruction Load Tests, 358
- 1715 Material and Test Standards, 359

CHAPTER 18 SOILS AND FOUNDATIONS, 361

Section

- 1801 General, 361
- 1802 Foundation and Soils Investigations, 361
- 1803 Excavation, Grading and Fill, 362
- 1804 Allowable Load-Bearing Values of Soils, 363
- 1805 Footings and Foundations, 364
- 1806 Retaining Walls, 372
- 1807 Dampproofing and Waterproofing, 372
- 1808 Pier and Pile Foundations, 373
- 1809 Driven Pile Foundations, 378

1811 Composite Piles, 384

1812 Pier Foundations 385

CHAPTER 19 CONCRETE, 387

Section

1901 General, 387

1902 Definitions, 387

1903 Specifications for Tests and Materials, 388

1904 Durability Requirements, 389

1905 Concrete Quality, Mixing and Placing, 392

1906 Formwork, Embedded Pipes and Construction Joints, 394

1907 Details of Reinforcement, 395

1908 Modifications to ACI 318, 397

1909 Structural Plain Concrete, 398

1910 Seismic Design Provisions, 399

1911 Minimum Slab Provisions, 400

1912 Anchorage to Concrete-Allowable Stress Design, 400

1913 Anchorage to Concrete-Strength Design, 401

1914 Shortcrete, 401

1915 Reinforced Gypsum Concrete, 402

1916 Concrete-Filled Pipe Columns, 403

CHAPTER 20 ALUMINUM, 405

Section

2001 General, 405

2002 Materials, 405

CHAPTER 21 MASONRY,

Section

2101 General, 407

2102 Definitions and Notations, 407

2103 Masonry Construction Materials, 410

2104 Construction, 414

2105 Quality Assurance, 416

2106 Seismic Design, 417

2107 Working Stress Design, 418

2108 Strength Design of Masonry, 419

2109 Empirical Design of Masonry, 419

2110 Glass Unit Masonry, 425

2111 Masonry Fireplaces, 427

2112 Masonry Heaters, 431

2113 Masonry Chimneys, 431

CHAPTER 22 STEEL, 437

- 2201 General, 437
- 2202 Definitions and Nomenclature, 437
- 2203 Identification and Protection of Steel for Structural Purposes, 437
- 2204 Connections, 437
- 2205 Structural Steel, 439
- 2206 Steel Joists, 439
- 2207 Steel Cable Structures, 439
- 2208 Steel Storage Racks, 439
- 2209 Cold-Formed Steel, 439
- 2210 Cold-Formed Steel Light Framed Construction, 440
- 2211 Cold-Formed Steel Light-Framed Shear Walls, 440

CHAPTER 23 WOOD, 445

Section

- 2301 General, 445

2003 International Building Code Introduction

SECTION 101- GENERAL

101.1 Title. These regulations shall be known as the Building Code of [NAME OF JURISDICTION], hereinafter referred to as "this code."

101.2 Scope. The provisions of this code shall apply to the construction, alteration, movement, enlargement, replacement, repair, equipment, use and occupancy, location, maintenance, removal and demolition of every building or structure or any appurtenances connected or attached to such buildings or structures.

Exceptions:

Detached one- and two-family dwellings and multiple single-family dwellings (town houses) not more than three stories above grade plane in height with a separate means of egress and their accessory structures shall comply with the International Residential Code.

Existing buildings undergoing repair, alterations or additions and change of occupancy shall be permitted to comply with the International Existing Building Code.

101.2.1 Appendices. Provisions in the appendices shall not apply unless specifically adopted.

101.3 Intent. The purpose of this code is to establish the minimum requirements to safeguard the public health, safety and general welfare through structural strength, means of egress facilities, stability, sanitation, adequate light and ventilation, energy conservation, and safety to life and property from fire and other hazards attributed to the built environment and to provide safety to fire fighters and emergency responders during emergency operations.

101.4 Referenced codes. The other codes listed in Sections 10 1.4.1 through 10 1.4.7 and

to the prescribed extent of each such reference.

101.4.1 Electrical. the provisions of the ICC Electrical Code shall apply to the installation of electrical systems, including alterations, repairs, replacement, equipment, appliances, fixtures, fittings and appurtenances thereto.

101.4.2 Gas. The provisions of the International Fuel Gas Code shall apply to the installation of gas piping from the point of delivery, gas appliances and related accessories as covered in this code. These requirements apply to gas piping systems extending from the point of delivery to the inlet connections of appliances and the installation and operation of residential and commercial gas appliances and related accessories.

101.4.3 Mechanical. The provisions of the International Mechanical Code shall apply to the installation, alterations, repairs and replacement of mechanical systems, including equipment, appliances, fixtures, fittings and/or appurtenances, including ventilating, heating, cooling, air-conditioning and refrigeration systems, incinerators and other energy-related systems.

101.4.4 Plumbing. The provisions of the International Plumbing Code shall apply to the installation, alteration, repair and replacement of plumbing systems, including equipment, appliances, fixtures, fittings and appurtenances, and where connected to a water or sewage system and all aspects of a medical gas system. The provisions of the International Private Sewage Disposal Code shall apply to private sewage disposal systems.

101.4.5 Property maintenance. The provisions of the International Property Maintenance Code shall apply to existing structures and premises; equipment and facilities; fight, ventilation, space heating, sanitation, life and fire safety hazards; responsibilities of owners, operators and occupants; and occupancy of existing premises and structures.

101.4.6 Fire prevention. The provisions of the International Fire Code shall apply to matters affecting or relating to structures, processes and premises from the hazard of fire and explosion arising from the storage, handling or use of structures, materials or devices; from conditions hazardous to life, property or public welfare in the occupancy of structures or premises; and from the construction, extension, re- pair, alteration or removal of fire suppression and alarm systems or fire hazards in the structure or on the premises from occupancy or operation.

101.4.7 Energy. The provisions of the International Energy Conservation Code shall apply to all matters governing the design and construction of buildings for energy efficiency.

SECTION 102 - APPLICABILITY

102.1 General. Where, in any specific case, different sections of this code specify different materials, methods of construction or other requirements, the most restrictive shall govern.

specific requirement shall be applicable.

102.2 Other laws. The provisions of this code shall not be deemed to nullify any provisions of local, state or federal law.

102.3 Application of references. References to chapter or section numbers, or to provisions not specifically identified by number, shall be construed to refer to such chapter, section or provision of this code.

102.4 Referenced codes and standards. The codes and standards referenced in this code shall be considered part of the requirements of this code to the prescribed extent of each such reference. Where differences occur between provisions of this code and referenced codes and standards, the provisions of this code shall apply.

102.5 Partial invalidity. In the event that any part or provision of this code is held to be illegal or void, this shall not have the effect of making void or illegal any of the other parts or provisions.

102.6 Existing structures. The legal occupancy of any structure existing on the date of adoption of this code shall be permitted to continue without change, except as is specifically covered in this code, the International Property Maintenance Code or the International Fire Code, or as is deemed necessary by the building official for the general safety and welfare of the occupants and the public.

SECTION 103 - DEPARTMENT OF BUILDING SAFETY

103.1 Creation of enforcement agency. The Department of Building Safety is hereby created and the official in charge thereof shall be known as the building official.

103.2 Appointment. The building official shall be appointed by the chief appointing authority of the jurisdiction.

103.3 Deputies. In accordance with the prescribed procedures of this jurisdiction and with the concurrence of the appointing authority, the building official shall have the authority to appoint a deputy building official, the related technical officers, inspectors, plan examiners and other employees. Such employees shall have powers as delegated by the building official. For the maintenance of existing properties, see the International Property Maintenance Code.

SECTION 104 - DUTIES AND POWERS OF BUILDING OFFICIAL

104.1 General. The building official is hereby authorized and directed to enforce the provisions of this code. The building official shall have the authority to render interpretations of this code and to adopt policies and procedures in order to clarify the

compliance with the intent and purpose of this code. Such policies and procedures shall not have the effect of waiving requirements specifically provided for in this code.

104.2 Applications and permits. The building official shall receive applications, review construction documents and issue permits for the erection, and alteration, demolition and moving of buildings and structures, inspect the premises for which such permits have been issued and enforce compliance with the provisions of this code.

104.3 Notices and orders. The building official shall issue all necessary notices or orders to ensure compliance with this code.

104.4 Inspections. The building official shall make all of the required inspections, or the building official shall have the authority to accept reports of inspection by approved agencies or individuals. Reports of such inspections shall be in writing and be certified by a responsible officer of such approved agency or by the responsible individual. The building official is authorized to engage such expert opinion as deemed necessary to report upon unusual technical issues that arise, subject to the approval of the appointing authority.

104.5 Identification. The building official shall carry proper identification when inspecting structures or premises in the performance of duties under this code.

104.6 Right of entry. Where it is necessary to make an inspection to enforce the provisions of this code, or where the building official has reasonable cause to believe that there exists in a structure or upon a premises a condition which is contrary to or in violation of this code which makes the structure or premises unsafe, dangerous or hazardous, the building official is authorized to enter the structure or premises at reasonable times to inspect or to perform the duties imposed by this code, provided that if such structure or premises be occupied that credentials be presented to the occupant and entry requested. If such structure or premises is unoccupied, the building official shall first make a reasonable effort to locate the owner or other person having charge or control of the structure or premises and request entry. If entry is refused, the building official shall have recourse to the remedies provided by law to secure entry.

104.7 Department records. The building official shall keep official records of applications received, permits and certificates issued, fees collected, reports of inspections, and notices and orders issued. Such records shall be retained in the official records for the period required for retention of public records.
