

Holy Cross surveys residents on health needs

Staff report

The Taos News, 17 Jan 2019

Holy Cross Medical Center is surveying residents to find out about the current health needs in Taos County.

The survey is conducted every three years, according to Gayle Martínez, the hospital's marketing director. The survey, available online and in hard copy, is anonymous.

"We need Taos County residents to provide the hospital, as well as coordinating healthcare agencies, with some valuable information on your perception of health-care needs for our community," Martínez said in a statement. "The responses will help drive strategic planning and budgets for the next three years."

Taos County residents are asked to fill out the survey and also encourage neighbors, family members and friends to take the survey. "The more people who take the survey, the better we will be able to understand health-care needs for Taos County," Martínez said.

Surveys must be completed by Friday, Jan. 25, 2019. The survey is also available on our website at holycrossmedicalcenter.org and on our Facebook page, Holy Cross Hospital Taos, and hard copies available at at the hospital front desk.

The survey takes about 15 minutes. Find it at
